1905

Coolspring United Methodist Church
Girdletree vicinity
Public worship

The Coolspring United Methodist Church, located between Snow Hill and Girdletree, is a well-preserved Gothic Revival frame structure erected for the black Methodist Episcopal congregation in 1905. Gothic arched windows light the single-story structure, which has a marble datestone in the southwest corner of the foundation. The original front entrance and flanking lancet windows were reused when a single-story addition was attached to the front of the church. Rising atop the gable roof is pyramidal roofed belfry distinguished by a square base sheathed with fishscale shingles. The open belfry is decorated with brackets and a wooden finial.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

Coolspring United Methodist Church stands on the east side of MD Route 12 between the towns of Snow Hill and Girdletree, Worcester County, Maryland. The single-story, gable front frame church faces west with the roof oriented on an east/west axis. Standing behind the church is a two-story frame meeting hall.

Built in 1905, the single-story, three-bay by four-bay frame church, supported by a brick pier foundation infilled with concrete block, is sheathed with asbestos shingles and it is covered by a steeply pitched asphalt shingle roof. Rising atop the gable roof is a pyramidal roofed belfry. Attached to the front of the original 1905 structure is a slightly shorter gable roofed addition that includes the principal entrance.

The west (main) facade is a three-bay elevation with a center pointed arch entrance and flanking pointed arch sash windows. The pointed arch entrance has a four-light colored glass transom and replacement doors. The window openings to each side are filled with colored glass. A diamond shaped window marks the upper gable. The door and window frames were evidently moved forward when the single-story addition was attached to the front of the original church. Fixed in the southwest corner of the church is a marble datestone inscribed, "Coolspring M. E. Church, 1905."

Fixed atop the original main block is a square belfry topped by a pyramidal roof with flared eaves. The open frame belfry, trimmed with decorative brackets, rests on a base that is sheathed with fishscale shingles. Fixed atop the pyramidal roof is a wooden finial.

The sides of the church are marked by four pointed arch sash, and an exterior single-flue stove stack rises through the extended eave. A single-story frame addition has been attached to the back of the church.

The meeting hall that stands behind the church is a two-story rectangular frame structure resting on a concrete block foundation and sheathed with plain weatherboards. The medium pitched roof is covered with asphalt shingles. Dating from around the same time as the church (1905) the building is lighted by six-over-six sash windows.
